Emergency Cryptographic Communications between Washington and Substations

REF: Your memo dated 23 October, subject as above

1. The Communications Division, as part of their emergency planning, is desirous of providing all OSO substations with an emergency cryptographic link direct to Washington. This link would be activated in the event normal communications were cut off between the base station and Washington, or if a grave emergency arose at the substation which would necessitate direct communications with Washington.

25X1A

2. Such emergency facilities have been included in the cryptographic plans for [] when that station is activated.

25X1A

3. Plans are being made to furnish [] with an emergency link to Washington. It is requested that any personnel who are to be assigned to [] in the future be scheduled to receive the complete cryptographic training course.
